The R1 Learning System

Evidence-Based & Best Practices

R1 Learning - About Us

R1 Learning is an education company providing interactive curriculum that engages and retains individuals in service, increases practitioner effectiveness through workforce training, and generates data for measuring outcomes. R1 delivers greater engagement for the leading evidence-based and best practice models and theories for mental health & wellness, substance use disorder, and life skills.

Enables organizations and programs to deliver a standardized, modular, and scalable library of curriculum through a consistent and repeatable process that maximizes the use of evidence-based practices and builds the foundation for measuring outcomes.

Engages, educates, and equips practitioners and coaches with tools and resources to increase their knowledge, skill, and effectiveness to deliver evidence-based practices to a wide-range of populations in a variety of settings.

Engages, educates, and empowers individuals to increase their knowledge in fundamental behavioral health and life skills topics, express themselves more effectively, and build the skills for change toward health and wellness.

RALEARNING SYSTEM RACURRICULUM Evidence-Based & Best Practices

R1 Curriculum Background

Evidence-based practice means a practice or treatment, that has been scientifically tested and subjected to clinical judgment and determined to be appropriate for the treatment of a given individual, population, or problem area.

The R1 Learning System was created to deliver on the Surgeon General's diagnosis – that effective treatment consists of evidence-based behavioral treatments, fully and properly implemented, and used with ongoing fidelity to the research evidence. Topics in the R1 Learning System were specifically chosen from the leading strategies for behavioral change and drawn from major guidance documents such as SAMHSA's TAP 21 guide of Addiction Counseling Competencies, the IC&RC counselor and peer support certification requirements, as well as the state-level licensing and certification bodies. R1 collaborates with the original researchers and authors of the EBP where possible to ensure that R1's content and training fully align with the evidence base.

R1 Learning topic content examples include Stages of Change (Prochaska, DiClemente), Recovery Capital (Best, Cloud, Granfield, White), Relapse Prevention (Gorski), Values (Schwartz), Affirmations (Steele), Phases of Addiction (Jellinek, Glatt), Defense Mechanisms (Vaillant), Substance Use Disorder (DSM – APA), Career Interests (Holland), etc.

The R1 interactive curriculum is grounded in proven behavioral health models, adapted from the work of the original authors and experts and supported by research. The R1 Learning System combines this content with tools, training, and additional resources to enable effective implementation and use of evidence-based practices such as motivational interviewing (MI) and cognitive behavioral therapy (CBT). The central content and tools of the system, the Discovery Cards, provide a hands-on (and hi-tech with R1 DISCOVER), concrete approach that enables both practitioners and clients to learn and apply these theories to real-life situations and circumstances. R1's tools are effective and easily adapted for different populations and settings and by practitioners at all levels of knowledge, skill, and experience. By combining the most effective content with a structure for effective implementation, R1 fosters greater engagement with treatment, counseling, and coaching — empowering individuals to live a healthy and purposeful life.

Recovery Capital Assessment (R1 RCA):

Outcomes Measurment

R1 Learning is partnering with Dr. David Best to deploy an evidence-based and best practice set of Recovery Capital solutions and a powerful engagement platform to help individuals, programs, networks, and communities create systemic change. The R1 RCA calculates individual Recovery Capital in five evidencebased and validated assessment categories that quantify Personal, Social and Community components. Learn more at: https://r1learning.com/r1recoverycapital

About R1:

R1 Founder & CEO

Tom Karl – Workforce Development Expert: Tom Karl founded R1 as the result of his own personal experiences in addiction and recovery. The idea for the R1 Learning System and the Discovery Cards came to Tom following a recurrence of use and hospitalization when he noted a lack of practical tools in addiction treatment settings. He has used the creation of the tools to help him better understand himself and address his own personal challenges. Through R1, Tom's goal is to put impactful self-discovery tools into the hands of individuals in recovery and empower them to change their lives. Tom has 25+ years of experience in workforce development, learning and development, and employee engagement, working with global companies, government agencies, and education institutions. Tom is active in the recovery community and volunteers with patient engagement programs.
